The Story of Katie Morag and

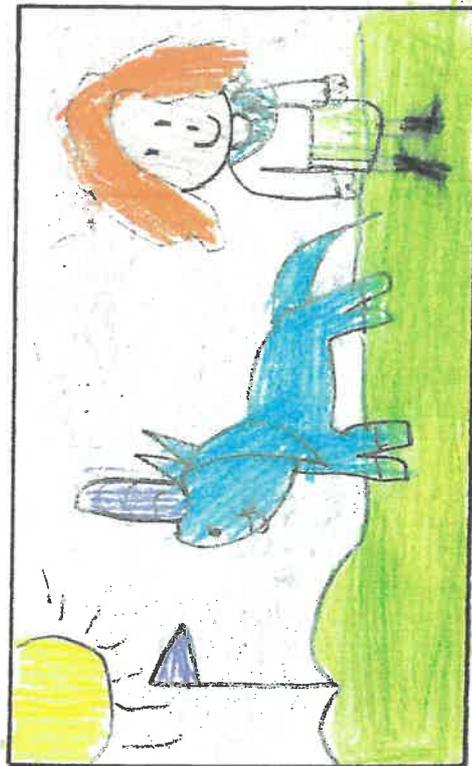

The Pink Fuzzy Unicorn.

By Alice.

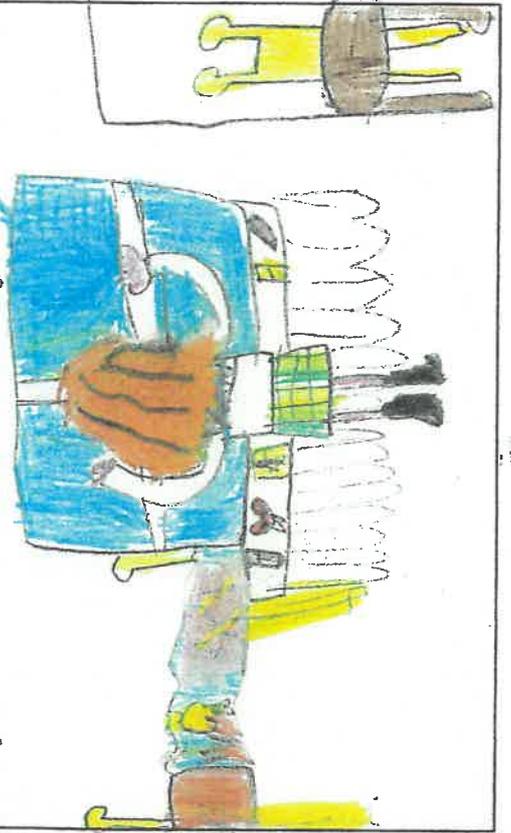

Katie Morag met a unicorn called Myla, they wanted to go to Rabbit Heaven Dunes but disaster

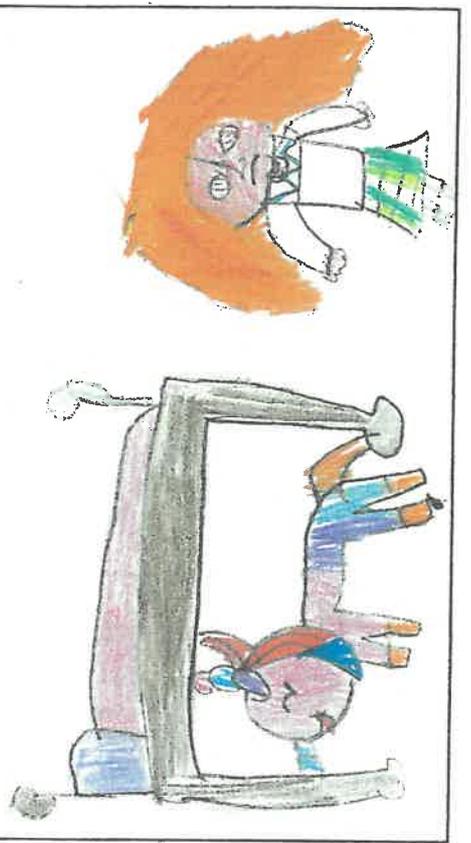

STRIKES!

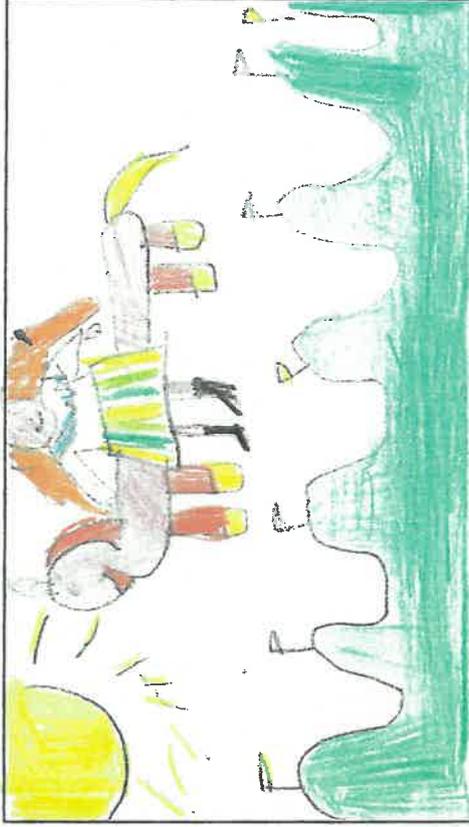

First Katie Morag was staring out of her shiny glass window. Her favourite teddy was lying on her comfy, cosy bed in her messy bedroom of the massive aisle of Stuyvesant Post office. Then she heard an cute, interrupting, screeching noise coming from under her golden wood bed. Katie Morag peeked

underneath her lumpy bed and saw a pink flying unicorn. The unicorn with special powers called Myla! "Is there any chance that I could go to wonderful Rabbit Heaven Cures with you?" She wondered, "Of course you can. Myla the flying unicorn," whispered Katie Morag.

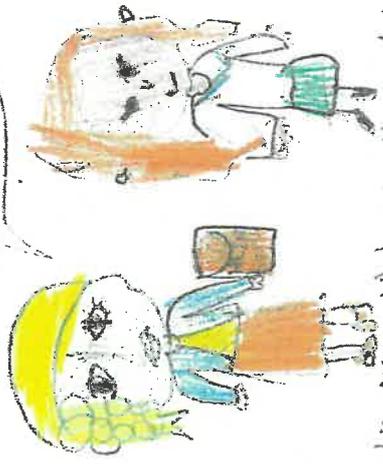

So off they flew over the bumpy, silent,
 green, golfcourse and WOOSHI Myla crashed
 and fell down onto a bumpy hill then started
 "I spanned my story, where, where! Myla was so
 sad because she loves colourful rabbits
 and she likes the look of wonderful rabbit
 Heaven Dunes. After that Myla shouted "I'm

to go there after all! So Katie Morag hopped
 onto her purple, white and pink bear. They flew
 back to the well-known, large shop & Post office.
 but Katie Morag had to show Myla the
 long direction of the huge post office. When they
 reached the post office they saw funny faces
 getting served with a can of boiling baked beans.

"Hello Katie Morag, what are you doing," she

asked. "Getting some useful supplies for my crazy

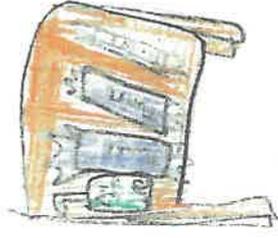

adventure with Myla the magic unicorn." She

answered. Agnes gasped. "I love real unicorns,

can I come with you?" "Fine," Katie Morag answered.

"But we are going to go up into my messy

bedroom and get some delicious snacks

from my old cupboard to eat at eating

Rabbit Heaven Diner," said Katie Morag. So

they tiptoed up the golden stairs into her

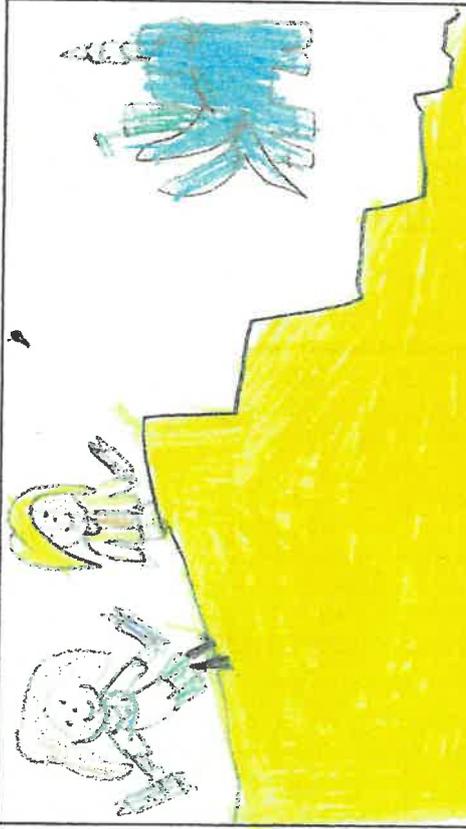

messy room while Katie along was carrying

lovely Myla up the cream white stairs.

When they got a couple of yummy snacks from

her room myla flew down the gleaming stairs,

with a carton of delicious apple juice.

While Agnes and Katie Morag were trotting

down behind her with 3 delicious chocolate

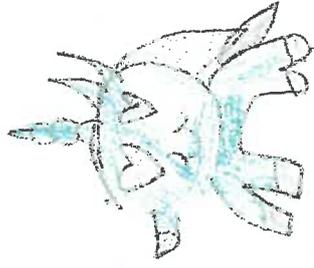

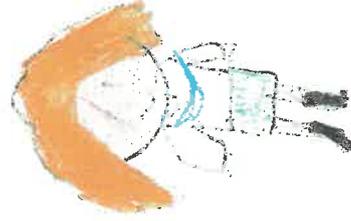

bars, when they got down the wooden

stairs Myla shot out the door in an

amazing speed. Katie Morag and Agnes screamed

in excitement. Myla was shouting at kind

Katie Morag because she wanted to know

with long direction to Oh in Katie saying

said "That way then when on the left then

Yaine then? Because Myla was so

excited she flew so fast she was there

in a quick second. Finally they

reached cool Rabbit Heaven Dunes. It

was so sunny and all of the rabbits

were very friendly.

When did the Romans eat their food?

Most Romans ate their main meal in the afternoon. They ate with their hands or

little spoons. What did Rich Romans

eat? Wealthy

Romans had huge

kitchens. Also Rich

Romans had

huge banquets almost every night

and they would eat until they were sick.

Who cooked for the Romans?

Some Rich Romans had slaves to cook. but some people with lots of

money in Rome cooked

their own food. poor people

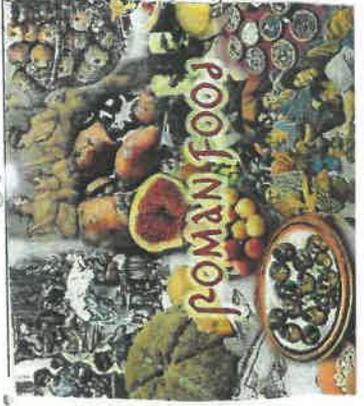

did not have slaves and

did not cook them

selves. so they got hot

food from shops and

took it back.

Hot Task

Write an imaginary recount of an evacuee who has been sent to live in Kendal from Newcastle upon Tyne.

Compare this to your cold write.

On September the 1st 1939, Operation Pied Piper. 16000 children were evacuated from Newcastle upon Tyne. I was one of them! My name is Sonya. It was one of the happiest and scariest times of my life. This is when my story begins. After a while, I arrived at night at Kendal railway station with my stally identification label and my little brother Jack who couldn't carry his gas mask and his suitcase at the same time. I grinned at him from ear to ear. The billeting officer shouted at the top of her lungs to stand in a line and to be smart. Every body pushed and jostled into a line. I protected my brother so he didn't fall to the wet ground. I bet Jack felt like he was on cloud nine, but I ~~was~~ didn't feel like that. I was the opposite. We started walking in a wanky line, and my brother's pull-over slipped out of his suitcase. (Typical Jack).

All of a sudden, it became bright. "It can't be day time already!" Jack muttered. "We are in St Georges school also known as the Distribution Centre" I responded. I bumped into my friend Lily. She was shaking like a bag and so was I. We stood in the empty hall and one by one the little children left. Then it was only me and Jack. The billeting officer yelled so loud my ear drums burst. "You know move it now I want to go to bed!"

We followed the bilking officer. All of a sudden a couple with a cat came in. "STOP!" They yelled "STOP!" The bilking officer froze. She turned around and sighed. "Right what do you want?" The grumpy bilking officer growled. "The children.... We would like to take those children?" They pushed. "What are your names?" The ex-cursed bilking officer yawned. "Jerry?" Replied the lovely lady. "Harry?" The tall man replied "Alright" then take them so I can go home and get my cunny belt." The grumpy pants bilking officer complied. They took me and my brother to this ugly farm. I stared at it in disgust. How could they bring me here? A month later, I got used to it I jumped in the mud. I would go on walks upon the mountains.

One hot day, I got told to feed the so called calm farm animals for the first time. ANNNN (that was me screaming!) I approached the animals. As soon as they saw the food they started chasing me. All of a sudden, I bumped into a black bull. I mean who would want a bull? I thought oh great I already have crazy chickens chasing me and the rest of the rest of the animals now I was going to get chased by a bull. Just great. Then when I got up I was going to get chased by a bull just great. Out of the blue, my friend Lily stood at

the short gate laughing while I was getting chased by crazy farm animals. Then she opened the gate and came in to help me. All of a sudden half of the wild animals chased Lily. We ran inside the large chicken coop and came up with a great idea. We jumped out of the large chicken coop and put all the food in the right pens and we ran for the gate. We laughed it all off.

Just after five o'clock, I went on my walk upon the mountains. I slipped along the mountains when all of a sudden I slipped and I could barely walk on the rock. Then suddenly I heard whistling and strange singing but it was in German. Then he came into view! He was a German prisoner! He offered to help me and I said yes. I was shaking like a leaf. I yelled thank you and I lost my running. I couldn't help but run. I tried to stop but it didn't work. I finally grabbed hold of my leg and fell (that hurt) and I started walking towards the German prisoner. In my head I thought don't do it but in my real head heart it said go just go. I finally saw him again. I asked politely if he wanted to come down to my best family with me. Yes he said yes. So I took him to my best family. They were shocked at first but they calmed down.

Finally the Blitz was over! I went down to Kendal railway station. The train was there but there was a familiar lady coming off. I finally saw who it was I started crying. It was my mam. I stayed at Kendal with my kind mam and my silly brother. After that I visited my hard family alot and so did my beautiful mam and caring brother. We were happy there and we never went back there again.

Renewable and non-renewable energy

This explanation is about renewable and non-renewable energy. There are lots of different types of energy. Fossil fuels pollute the air and should be used as little as possible.

Renewable energy means that it will never run out. Things like the sun, wind and water are all renewable sources. Non-renewable means the exact opposite. Things like coal, oil and gas we will eventually run out of. They can also be called fossil fuels because they are dug out of the ground.

Over 80% of electricity around the world is still fossil fuels. We need to start using renewable energy more. There are lots of advantages to having renewable energy: It is cheaper (you don't have to pay for the sun!); it's easy to set up and it's healthy for the environment and you. But the disadvantages are: it disturbs wildlife; if the sun isn't shining then there is no solar power and if the wind isn't blowing then there is no wind power.

In the future, energy will hopefully be the only energy source. If tis achieved then then the world will be a healthier place.
